1. What is the purpose of the `iframe` tag in HTML?

1 / 1 point

- ☐ To create a new window within a webpage
- ☒ To embed another document within the current HTML document
- ☐ To define a client-side image-map.
- ☐ To display a scrolling text or an image

✔ Correct

The tag is used to embed another document within the current HTML document.

2. Which of the following HTML attributes is used to provide alternative text when an image cannot be displayed?

1 / 1 point

- ☐ title
- ☐ src
- ☒ alt
- ☐ href

✔ Correct

alt attribute provides alternative information for an image if a user for some reason cannot view it.

3. What is the purpose of using a relative path in a webpage?

1 / 1 point

- ☐ To link to files that are in a different website
- ☒ To link to files that are within the same website, regardless of their location
- ☐ To demonstrate the hierarchy of files in the server
- ☐ To specify the exact location of a file on the server

✔ Correct

Relative paths allow you to link to files within the same website, regardless of where they are located.

4. What is the purpose of the `'href'` attribute in an anchor tag in HTML?

1 / 1 point

- ☒ To specify the destination of the link
- ☐ To name the link
- ☐ To set the style of the link
- ☐ To designate the link as active or inactive

✔ Correct

The `'href'` attribute specifies the destination of the link.

5. If you want to link to a section on the same page, what kind of value would you use for the `'href'` attribute?

1 / 1 point

- ☐ The name of the section
- ☒ The id of the section
- ☐ The class of the section
- ☐ The URL of the page

✔ Correct

The id of the section is used to link to a specific section on the same page.

6. What is the effect of setting the `'href'` attribute to `'#'` in an anchor tag?

1 / 1 point

- ☐ The link will lead to the last section of the page
- ☐ The link will become inactive

- ☐ The link will become inactive
- ☐ The link will lead to the top of the page
- ☐ The link will lead to a random section of the page

✔ Correct

When the 'href' attribute is set to '#', the link leads to the top of the page.

7. Which of the following image formats support animation?

1 / 1 point

- ☐ BMP
- ☐ SVG
- ☐ GIF
- ☐ JPEG
- ☐ PNG

✔ Correct

GIF supports animation, which is one reason it's commonly used for simple web animations.

8. Which image format is most appropriate for a logo with a transparent background?

1 / 1 point

- ☐ PNG
- ☐ JPEG
- ☐ BMP
- ☐ GIF

✔ Correct

PNG supports transparency and a wide range of colors, making it ideal for a logo with a transparent background.

9. A website is displaying a photograph as its background. The image is very detailed and needs to maintain its quality. Which image format would be the best choice?

1 / 1 point

- ☐ JPEG
- ☐ BMP
- ☐ PNG
- ☐ GIF

✔ Correct

JPEG is often used for photographs due to its ability to display a wide range of colors and maintain image quality.
